Whereas, we, King County and the undersigned cities of King County, wish to work together to directly respond to climate change and reduce global and local sources of climate pollution;

Whereas, we believe that by working together we can increase our efficiency and effectiveness in making progress towards this goal;

Whereas, we are interested in achieving this goal in a way that builds a cleaner, stronger and more resilient regional economy;

Whereas, we are interested in focusing on local solutions to leverage and partner with related collaborative efforts;

Whereas, partnering on sustainable solutions will advance progress towards Cities' environmental, climate change, and energy goals such as those adopted by the nearly half of King County Cities that have signed on to the U.S. Conference of Mayors Climate Protection Agreement;

Now, therefore, we agree to participate in this effort and collaborate regionally with our County and City partners to develop and coordinate the following:

- Outreach: Develop, refine, and utilize messaging and tools for climate change outreach to engage decision makers, other cities, and the general public.
- Coordination: Collaborate on adopting consistent standards, benchmarks, strategies, and overall goals related to responding to climate change.
- Solutions: Share local success stories, challenges, data and products that support and enhance climate mitigation efforts by all partners.
- Funding and resources: Collaborate to secure grant funding and other shared resource opportunities to support climate related projects and programs.

My city will participate and contribute to the King County-Cities Climate Collaboration by dedicating staff and a financial contribution, based on my city's population, per Exhibit A.
